Seeking internship in the field of Computer Science and Engineering with interest in front-end development

Skills

LANGUAGES

C++
Python
HTML
CSS
Javascript
React
Java
Matlab
SQL
LaTeX

Education

Texas A&M University   Aug. 2018 to Current

Bachelor of Science Computer Science 2022

Minor: Cybersecurity

Current Classes: Computer Systems, Programming Studio, Cybersecurity and Digital Ethics
Previous Classes: Data Structures & Algorithms, Computer Organization, Program Design, Discrete Structures
GPA: 3.4

Projects

Weatherly

- Enabling users to find the current weather forecast of their city of choice using OpenWeather API with a dynamic display based on temperature
- Designed UI/UX using HTML/CSS and integrated with React

Night Owl Database

- Using Yelp datasets, my team imported essential info into our own database using an AWS server and formulated helpful user SQL queries that could be made through our GUI
- Database was implemented in Python and SQL and the interface was designed in Java

JustToDo

- Providing planners a web scheduling application that gives them the optimal tools for organizing tasks at hand using HTML/CSS and JavaScript

Tipper

- Developed and implemented an Android tipping app to help customers decide how much to tip servers according to the quality of their dine-in experience using XML and Kotlin

Activities

Aggie Coding Club (ACC)   Current
Member

- Worked in UI/UX team on the Barhoppery app, a car riding service for A&M students who have had a few too many at the bar
- Engaged in the diverse workshops ranging from all interests of programming hosted by the ACC officers

Society of Asian Scientists & Engineers (SASE)   Current
Member

- Involvement in workshops that honed on improving technical and interpersonal skills needed for a professional workplace environment
